Dear Parents

### Science Enrichment Project – Solar Car Challenge

The children in Year 6 are invited to participate in an extra-curricular Science enrichment project.

The challenge requires students to apply engineering skills and knowledge of solar energy and photovoltaics to build and race a model car. This will be a hands-on, fun STEM learning experience providing our students with an opportunity to challenge themselves and compete against their peers.

The project will be open to all students across Year 6 however, small group rotations will be arranged across the semester due to the complex management and resourcing connected to the activity.

This letter is to let you know that your son/daughter has been allocated a position in the following group which will require your son/daughter to be at school from 8am on the following days:-

Session 1	Wednesday February 21
Session 2	Wednesday February 28
Session 3	Wednesday March 7
Session 4	Wednesday March 14

Each session will commence at 8am and operate from our newly renovated Science Room in the Rosalie Pavilion. The session will be supervised by Ms Shannon and Mr Shepherd. There is no cost to this activity. Participation in this challenge is voluntary, but a commitment to attend all sessions will be required.

Please complete the permission slip below and return it to your classroom teacher by Monday February 19 as this position could be reallocated.

Louis Shepherd  
Deputy Principal  
16 February 2018

---

### RETURN TO CLASS TEACHER

I have discussed this project with my son/daughter and would like to confirm his/her place in the group for dates and time mentioned.
